**ISSUE:** Cancellation of NNSA SD 415.1A.

**BACKGROUND:** NNSA SD 415.1A, issued on April 27, 2021, served to ensure information technology (IT) investments are managed with the proper safeguards, oversight, and security standards necessary to comply with the Federal Information Technology Acquisition Reform Act (FITARA), along with other federal laws and regulations. The requirements and responsibilities described in SD 415.1A have been incorporated into SD 200.1, *Information Resources Management*, approved December 14, 2023. As a result, SD 415.1A is duplicative and no longer required.

SD 415.1A was circulated throughout the Nuclear Security Enterprise for review and cancellation concurrence. 17 offices concurred, and 20 offices did not respond. No offices non-concurred.

**SENSITIVITIES:** None.

**POLICY IMPACT:** None.

**URGENCY:** None.

**RECOMMENDATION:** Approve the cancellation of NNSA SD 415.1A, *Project Oversight for Information Technology (PO-IT)*.
